# Private Equity

This is not an offer to sell nor a solicitation of an offer to buy shares of CNL Strategic Capital. Only the prospectus makes such an offer. This piece must be read in conjunction with the prospectus in order to understand fully all the objectives, risks, charges and expenses associated with an investment and must not be relied upon to make a decision.

CNL®

Please read the prospectus, including the Risk Factors section, for full details.  
The prospectus is available at [sec.gov](http://sec.gov) and [cnlstrategiccapital.com](http://cnlstrategiccapital.com), or may be obtained by calling 866-650-0650.

## RISK FACTORS

- **Offering Risk.** An investment in CNL Strategic Capital, LLC is considered speculative and involves a high degree of risk, including the loss of all or a substantial amount of your investment. CNL Strategic Capital's offering is on a best-efforts basis. There is no guarantee that CNL Strategic Capital will raise additional funds; therefore, it may not be able to acquire targeted assets, which reduces diversification and increases the potential of volatility.
- **Investment Objective Risk.** There is no assurance the investment strategy or objectives of CNL Strategic Capital will be achieved. Inability to invest the net offering proceeds on acceptable terms, consistent with the business strategy and within the time frame contemplated by the offering may exist. CNL Strategic Capital may face risks with respect to the evaluation and management of future acquisitions.
- **Undue Reliance on Managers or Past Performance.** CNL Strategic Capital Management, LLC is acting as the manager. The sub-manager is Levine Leichtman Strategic Capital, LLC, an affiliate of Levine Leichtman Capital Partners, LLC (LLCP). Each managing entity is an investment adviser registered with the U.S. Securities and Exchange Commission. Investors should not rely on the past performance of the managers and their respective affiliates as an indication of future performance. CNL Strategic Capital is a different investment vehicle with fees and risks dissimilar to the managers' other funds and this is the first time the managers have partnered together.
- **Conflicts of Interest Risk.** CNL Strategic Capital's managers and their respective affiliates face conflicts of interest, including those that result from compensation arrangements and allocations of business opportunities. See the prospectus for details. CNL Strategic Capital pays substantial fees and expenses to the manager, the sub-manager, the managing dealer or their respective affiliates. These payments increase the risk that investors will not earn a profit on their investment. In certain cases, CNL Strategic Capital will invest alongside the sub-manager, its affiliates and third parties. Co-investing with other investment groups will increase the risk that third parties may make decisions with which CNL Strategic Capital does not fully agree. CNL Strategic Capital will not purchase these businesses unless a majority of the independent directors determines the transaction is fair and reasonable.
- **Inability to make Distributions Risk.** Distributions are not guaranteed in frequency or amount. Distributions paid are not solely based upon performance. Distributions may be funded from multiple sources, including, but not limited to, offering proceeds, borrowings, net investment income and expense waivers. Distributions that are not derived from net income produced by performance may not be sustainable and may dilute investors. Subject to certain conditions being met, CNL Strategic Capital is obligated to repay expense support to the managers over several years, which would reduce future income available for distributions.
- **Use of Leverage Risk.** CNL Strategic Capital's strategy is to use leverage in an amount not to exceed 35% of its gross assets; however, CNL Strategic Capital may exceed the 35% at any time, if approved by a majority of its independent directors. Separate from the fund's leverage, certain businesses in its portfolio may have third-party debt. The use of leverage and its limits is subject to change. For the most current fund leverage, please reference CNL Strategic Capital's recent SEC filings.
- **Valuation Risk.** Asset valuations will be estimates of fair value, which is calculated from CNL Strategic Capital's financial statements prepared in accordance with GAAP, and do not represent the amount an investor would receive now or at any time in the future. CNL Strategic Capital's estimate of fair value for the portfolio is inherently subjective, and the net asset value (NAV) may not accurately reflect the actual price at which its assets could be liquidated. The realized value of shares will be dependent upon market conditions that are beyond anyone's ability to control or predict.

- **Liquidity Risk.** An investment in CNL Strategic Capital is illiquid. Shares sold in this offering will not be listed on an exchange or quoted through a quotation system for the foreseeable future, if ever. If investors are able to sell their shares, they will likely receive less than their purchase price. The share repurchase program has numerous restrictions and offers redemptions up to 2.5% of CNL Strategic Capital's aggregate NAV per calendar quarter and up to 10% of the aggregate NAV for the prior four quarters. The board of directors may suspend or modify the program at any time.
- **Past performance is not indicative of future results.**

# Changes in the public markets are having an effect on your investment portfolio

## FEWER PUBLIC INVESTMENT OPTIONS

In 1996, the number of public companies peaked at more than 8,000. Today, there are approximately 50% less. One of the primary reasons for the decline is due to fewer IPOs (Initial Public Offerings). When companies wait longer to go public, they may already be past some of their highest-growth years. Additionally, when the number of publicly traded companies has been dramatically reduced, there may be fewer business investments available to diversify portfolios.

## UNCERTAINTY IS HERE TO STAY

Inflation, geopolitical conflicts and the effects of government policy, among other factors, have created headwinds for the U.S. financial markets.

# Significant opportunity exists in the private markets

## U.S. PUBLIC MIDDLE-MARKET COMPANIES

Investors focusing on public companies access less than 2% of the middle-market universe.

# What if you had a way to invest in durable, growing, private companies traditionally unavailable to you?

The potential for competitive returns by accessing private companies has been traditionally reserved for institutional investors and high-net-worth individuals.<sup>1</sup>

Today, CNL Strategic Capital provides access to a differentiated private equity strategy for individual investors.

## CNL STRATEGIC CAPITAL IS:

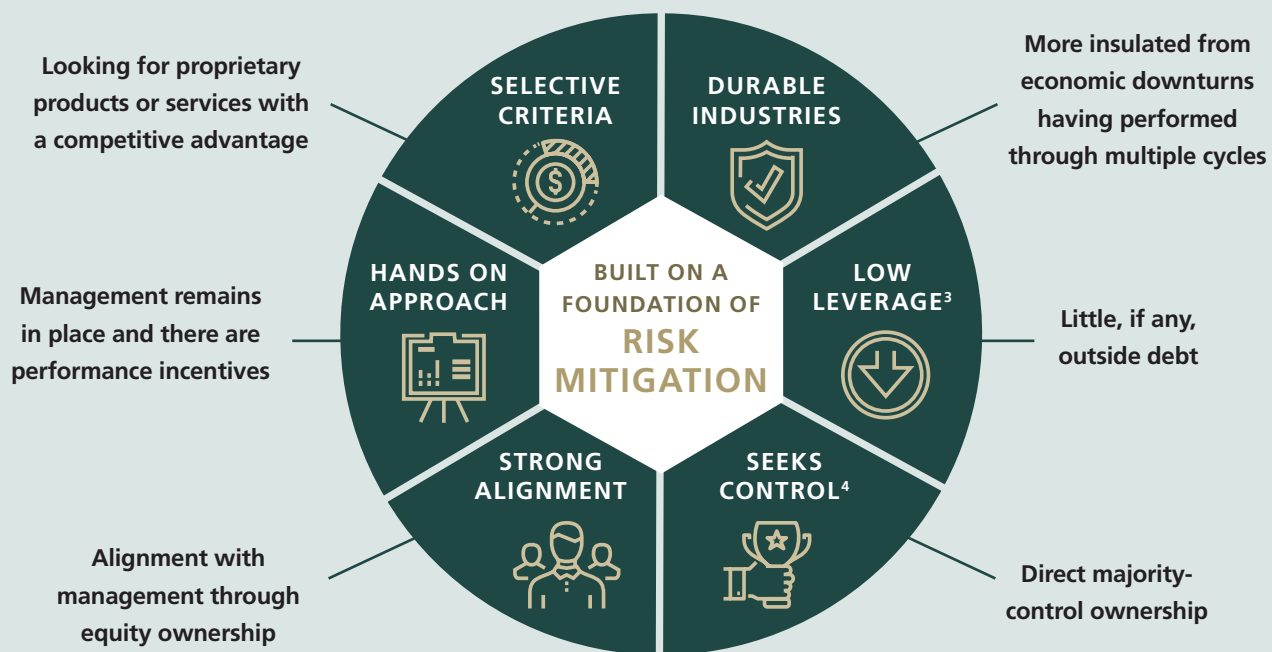

A company that seeks to own durable private U.S. companies, providing your investment portfolio with the potential for growth, monthly income and diversity outside of the publicly traded financial markets.<sup>2</sup>

## CNL STRATEGIC CAPITAL IS NOT A:

- Publicly Traded Investment
- Real Estate Investment Trust (REIT)
- Business Development Company (BDC)
- Mutual Fund
- Traditional Private Equity Fund
- Fund of Funds

Distribution payments are not guaranteed in frequency or amount. Distributions may be funded from net investment income, offering proceeds and borrowings, as well as, in significant part, reimbursable expense support and fee deferrals; the latter three will reduce future cash available for distributions and be dilutive to shareholders. In addition, temporary waivers or expense reimbursements that may be subject to reimbursement to the adviser, or its affiliates may have a smoothing effect on NAV per share and/or distribution payments.

This investment is considered speculative, has substantial costs and differs from traditional private equity. There is no assurance the stated objectives will be met.

<sup>1</sup>Institutional investors invest with strategies, terms and conditions different from those of individual investors, who typically have a shorter investment time horizon, possess lower risk capacity, greater liquidity needs, and pay higher fees and expenses for retail offerings.

<sup>2</sup>Distributions paid are not solely based upon performance.

<sup>3</sup>Subject to change. CNL Strategic Capital's strategy is to use fund leverage in an amount not to exceed 35% of its gross assets; however, CNL Strategic Capital may exceed the 35% limit at any time, if approved by a majority of our independent directors. Separate from the fund's leverage, certain businesses in its portfolio have third-party debt. For the most current fund leverage, please reference CNL Strategic Capital's recent SEC filings.

<sup>4</sup>CNL Strategic Capital seeks acquisitions that will involve controlling equity interests; however, in some situations, such as co-investment, control will be limited.
